

Virtual care, purpose-built for multidisciplinary treatment

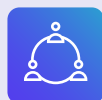

InQ gives **Rapid Access Addiction Medicine (RAAM)** programs a simple, app-less entry point that matches real clinic workflows. Patients join with one link, and staff can triage, queue, and route between clinicians without broken handoffs – supporting both scheduled and virtual walk-in care.

Browser-based access
– no app downloads

Purpose-built waiting room
for clinic workflows

Seamless handoffs
between team members

Tracks & reports
program KPIs

Supports triage for walk-ins
& phone-based clients

Built for group programs
and 1:1 care
